116: Colorado River System Conservation Pilot Program (SCPP)

Ripple Effect

Education

[Listen on Apple Podcasts](#)

Lily Bosworth of the Colorado River Authority of Utah explains the new 2023 System Conservation Pilot Program (SCPP). SCPP was originally instituted between 2015-2018 to gauge interest in leasing water to aid declining Colorado River flows. As part of the Upper Colorado River Commission's 5 Point plan, SCPP has been reinstated for 2023 to assist with acute drought conditions. Super informative and timely!!
